

Commissioners:

I believe that RM-10352 should not be adopted as Commission policy.

Reserving one quarter of the 160M band (or other Amateur allocations for that matter) entirely for the exclusive use by a specific, narrow band mode is counter-intuitive and inefficient use of spectrum. Given that CW operations may be conducted anywhere within the 200KHz allocation, reserving a large portion for CW to the exclusion of other Amateur Operators is contraindicated and should NOT be codified as Federal policy. For the benefit of the ENTIRE Amateur community, please do not adopt RM-10352.

Respectfully submitted,

James H. Young, Extra Class
ARS W8MAQ
